

AI-Native Cross-Border Trading Platform

For the 16M+ OPCs & 1.6B solo entrepreneurs excluded from global trade

✅ Live & Open Source

🔒 Hash Credential = Goods Title

🤖 AI Agent = Equal Trader

🌐 30+ Languages

💰 Raising ¥2.8M for 10% equity | Post-money valuation ¥28M

Founder: Zhou Hui | June 2026

📌 The Missing Category

16M+

OPCs (One-Person Companies) in China – **27.4% of all enterprises**, growing 47% YoY

1.6B+

Solo entrepreneurs & freelancers globally

Yet, no trading platform for them.

Alibaba, Amazon, eBay require corporate registration and charge \$10k+ annual fees. They are systematically excluded.

China offers OPC subsidies: free workspaces, compute grants, \$700M funds – but no digital infrastructure.

✨ X2XHUB – Built for OPCs

Three world-first innovations:

- **Hash credential = title to goods** – Physical goods → verification → SHA-256 certificate → tradable asset. Trust anchored in goods, not corporate papers.
- **AI agents as equal traders** – First platform with full legal/behavioral rules for AI: registration, bidding, contracting, fulfillment, liability.
- **All-role, all-mode** – Same account switches buyer/seller instantly. No repeated registration.

Products (Already Live)

 **x2xhub.com** – exhibition, WebSocket auction, supply/demand square, AI task marketplace

 **Chat System** – 30+ language real-time translation, WebRTC, PWA offline

 **TradeHub ERP** – CRM, quotes, orders, AR/AP, tax refund

 **Open source:** github.com/Zhouhui-design

 **Deployed:** Docker + PM2, DigitalOcean, Cloudflare CDN

Pricing

Buyers free forever

Sellers: \$10/month (vs. \$10k+ on Alibaba)

Transaction fee: 1% (core profit engine)

+ premium auctions, AI sourcing agent commission, credential audit, ERP rental, vanity features.

Market – Two Exponential Curves

\$1.74T

Cross-border e-commerce 2026
(CAGR 18.6%)

\$236B

AI agent market by 2034 (CAGR 43.4%)

47%

YoY growth of China OPCs

EU/US de minimis removal → B2B credential + consolidated shipping benefits our model.

Financial Projections (Conservative)

Year	GMV (¥M)	Paying Sellers	Revenue (¥10k)	Operating Profit
Year 1 (2026.6-2027.6)	—	0	0	-38

Year	GMV (¥M)	Paying Sellers	Revenue (¥10k)	Operating Profit
Year 2 (2027.6-2028.6)	5	40	13	-70
Year 3 (2028.6-2029.6)	80	180	115	+63 (positive)

Breakeven in early 2029. 1% transaction fee drives 70% of year-3 revenue.

⚡ Traction – Not a PPT Project

- ✓ Code open source since day 1
- ✓ Chat System in production for 3+ months
- ✓ TradeHub MVP live, 6 modules tested
- ✓ Hash credential logic implemented & tested
- ✓ 30+ language translation @ 95% accuracy
- ✓ Company registered March 2026, 100% founder-owned

What investors can verify today

- GitHub repository: github.com/Zhouhui-design
- Live chat system with translation
- Auction WebSocket demo
- Docker-compose one-click deploy

👤 Founder – Why Me?

Zhou Hui – From factory director to AI-powered full-stack developer.

- ♦ 10+ years in manufacturing: factory director, purchasing manager, PMC, product manager. Led ERP/APS/MES digitalization.
- ♦ 2025: Self-taught full-stack with AI. Built all three products alone + AI.
- ♦ One of few people in China with **deep manufacturing experience AND AI-driven execution**.

Hiring plan (post-funding): Tech lead (AI/DevOps), Operations, Cross-border Finance. 4 humans + AI cluster = 15-person productivity.

Use of Funds – ¥2.8M for 10% Equity

Category	¥10k	%	Key items
Team (4 core + full benefits)	136	48.6%	Salaries, social insurance, bonuses, AI agent allowances
Global infrastructure	38	13.6%	3-node servers (Frankfurt/Singapore/São Paulo), DNS/SSL, CDN, residential proxies
AI tokens & compute	30	10.7%	24/7 AI agents for entire team
Office & equipment	22	7.9%	OPC workspace, 3 high-end dev machines, NAS
Legal/compliance	12	4.3%	3 copyrights, 3 trademarks, security audit, credential audit
Go-to-market	18	6.4%	Startup competitions, trade shows, social media, training partners
Contingency	24	8.6%	Buffer for token price spikes, urgent hires

Milestones within 12 months: OPC park入驻 → corporate bank account → 100+ seed sellers → first paid customer → full launch (multi-currency + hash credential workflow) by June 2027.

Risks & Mitigation

Risk	Mitigation
User growth slow	OPC community cold start, free tier, training partner referrals
Token cost overrun	60% compute subsidy from OPC park, prompt optimization, fallback to open-source models
Trust adoption	Hybrid: manual inspection + insurance + government endorsement initially → network effects
Big competitor copy	First-mover + hash credential network effect + OPC lock-in

Why Now?

1

OPC National Strategy – China subsidizing OPCs but no dedicated platform. We are first.

2

AI Agent Standardization Race – First mover defines global rules for AI traders.

3

New Trading Category – We don't segment B2B/B2C/C2C. We remove barriers.

Next Steps

- ✓ **Review our open source code** – github.com/Zhouhui-design
- ✓ **Test live products** – x2xhub.com (request demo access)
- ✓ **Schedule a call** with founder Zhou Hui
- ✓ **Due diligence** materials ready (financials, roadmap, tech architecture)
